After PSPO — the next step

LEAN-AGILE THINKING

PO Accelerating Value

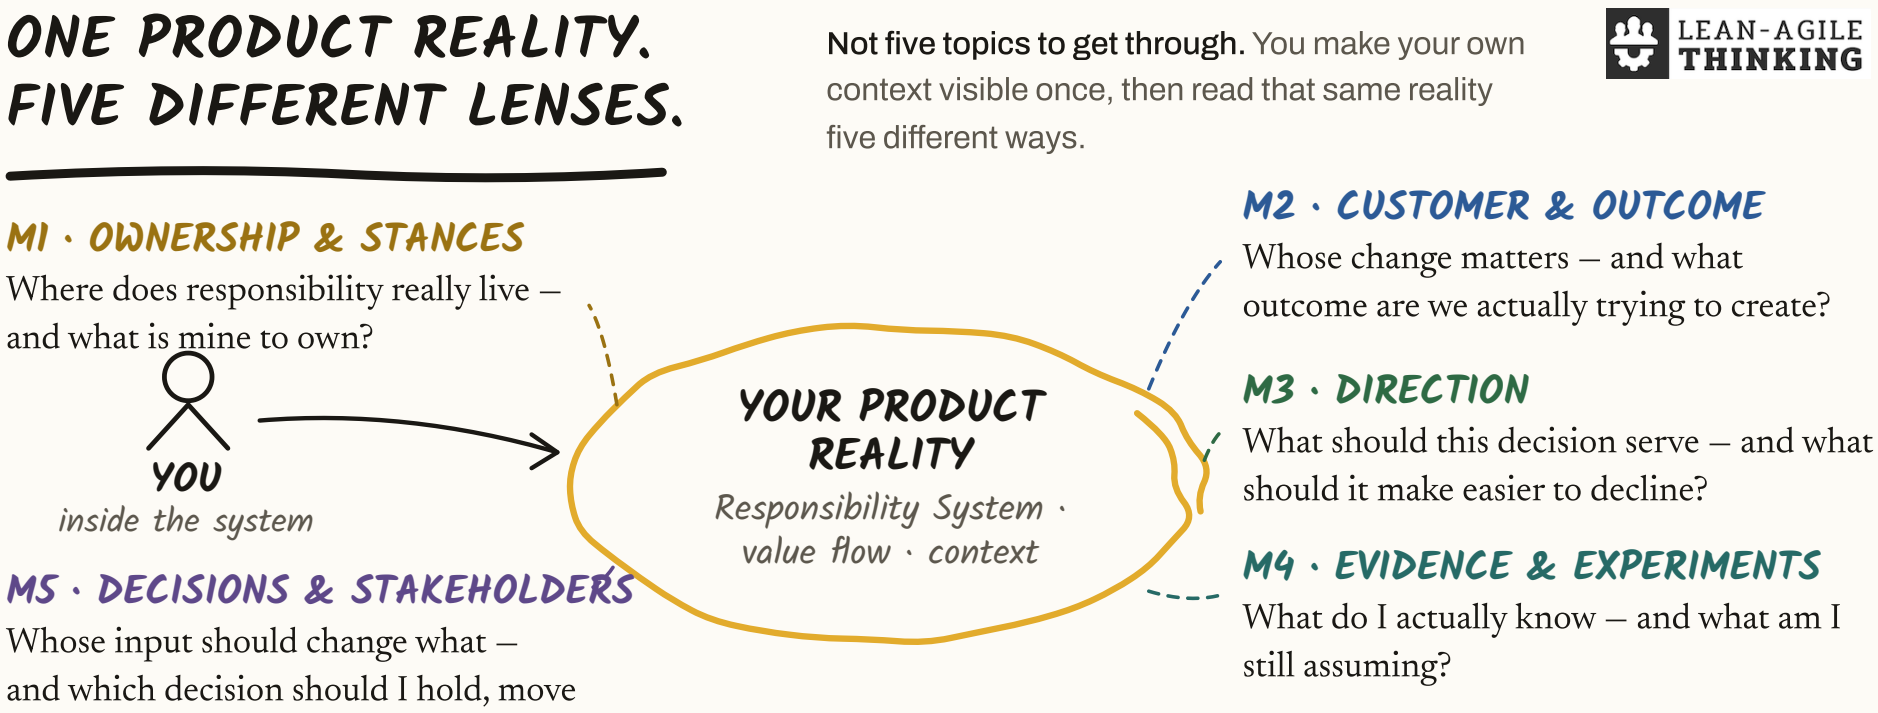
Better product decisions — in your own context.

PSPO gives you shared language, principles and a strong foundation. PO Accelerating Value develops the judgement to use them when evidence is incomplete, authority is distributed and the consequences of product decisions are real.

Seven weeks of advanced Product Owner judgement, applied to *your own product reality.*

ONE PRODUCT REALITY. FIVE DIFFERENT LENSES.

Not five topics to get through. You make your own context visible once, then read that same reality five different ways.



SAY YES AND NO ON PURPOSE

on the best available evidence, with the whole system in view.

SEVEN WEEKS — ONLINE · seven weeks · WEEKLY LIVE · one hour · ENGLISH · throughout

M0 · WEEK 1
Make your context visible
Bound your Responsibility System, map the value flow and surface a real tension.

→

M1–M5 · WEEKS 2–6
Read it through five lenses
Apply each lens to the same product reality, make one concrete move and learn from what happens.

→

M6 · WEEK 7
Integrate your judgement
Bring the lenses together around a difficult product decision with real consequences for value delivery.

EVERY WEEK · ONE LOOP IN YOUR OWN CONTEXT

1. ***Learn & practise*** — *Scenario Practice*
2. ***Bring your context*** — *your context on the shared board*
3. ***Reason live*** — *live session with Mads*
4. ***Try one move*** — *bounded action*
5. ***Observe & refine*** — *evidence from what happened*

Every session opens with: **"What happened when you tried it?"**

Accelerate value delivery *— in your own context.*

PO ACCELERATING VALUE

Seven weeks in your own context.

Work on your real product decisions — not a classroom case.

Guided material · Scenario Practice · own-context application · weekly live session with Mads
