After PSM — the next step

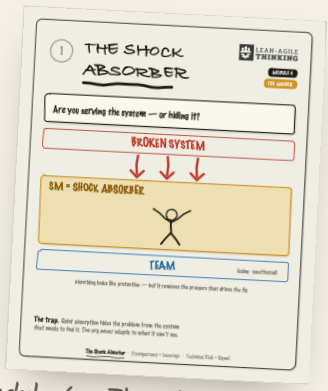
LEAN-AGILE THINKING

SM Accelerating Value

Better Scrum Master judgement — in your own context.

PSM gives you a strong Scrum Master foundation. SM Accelerating Value develops the judgement to use it when problems are ambiguous, accountability is distributed and the impediments sit outside the team.

Accelerating value does not mean more Scrum. It means better judgement in *an imperfect context.*



Module 4 · The Shock Absorber

ONE TEAM & SYSTEM REALITY. FIVE DIFFERENT LENSES.

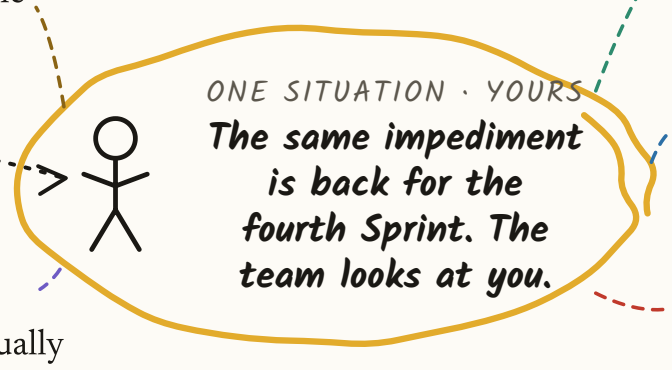
LEAN-AGILE THINKING

Not five topics to get through. You make your situation visible once, then read the team and system in front of you five different ways.

M1 · SCRUM MASTER STANCES

Which stance fits here — and which one am I reaching for by reflex?

YOU
the Scrum Master, inside the system



M2 · TEAM EFFECTIVENESS

What is the team not doing because I am doing it?

M3 · PRODUCT & VALUE

What needs to become more transparent about value — without me taking over?

M4 · SYSTEMS & IMPEDIMENTS

Local or systemic — and who can actually change it?

M5 · CHANGE & INFLUENCE

Who needs to move — and what is actually mine to influence?

ACTIVE IN VALUE — WITHOUT TAKING OVER

Product decisions stay with the Product Owner; the Developers' decisions stay with the Developers.

SEVEN WEEKS — **ONLINE** · seven weeks **WEEKLY LIVE** · one session **ENGLISH** · throughout

M0 · WEEK 1
Make your context visible
Reactivate your Scrum foundation, map how value is delivered today and carry one real tension forward.

→

M1–M5 · WEEKS 2–6
Read it through five lenses
Apply each lens to the same situation, try one move and learn from what happens.

→

M6 · WEEK 7
Integrate your judgement
Bring the lenses together around a difficult real situation — and what your intervention does to capability over time.

EVERY WEEK · ONE LOOP IN YOUR OWN CONTEXT

1. ***Learn*** — *guided material, in pieces*
2. ***Reason*** — *Scenario Practice dilemmas*
3. ***Bring your context*** — *your slot on the shared board*
4. ***Discuss*** — *live session with Mads*
5. ***Try a move*** — *small enough to actually do*
6. ***Observe & refine*** — *next week opens on what happened*

Every session opens with: ***"What happened when you tried it?"***

Accelerate value delivery *— in your own context.*

SM ACCELERATING VALUE

Seven weeks in your own context.

Work on your real Scrum Master situations — not classroom cases.

Guided material · Scenario Practice · own-context application · weekly live session with Mads
