

— After PSM — the next step

SM Advanced

Better Scrum Master judgement — in your own context.

PSM gives you a strong Scrum Master foundation. SM Advanced develops the judgement to use it when problems are ambiguous, accountability is distributed and the impediments sit outside the team.

Advanced does not mean more Scrum. It means better judgement in an imperfect context.

Module 4 · The Shock Absorber

ONE TEAM & SYSTEM REALITY. FIVE DIFFERENT LENSES.

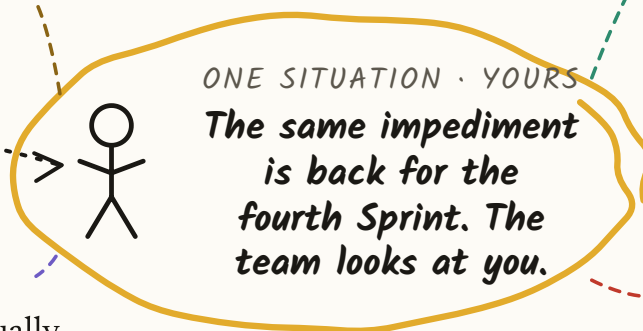

M1 · SCRUM MASTER STANCES

Which stance fits here — and which one am I reaching for by reflex?

YOU
the Scrum Master,
inside the system

M5 · CHANGE & INFLUENCE

Who needs to move — and what is actually mine to influence?

Not five topics to get through. You make your situation visible once, then read the team and system in front of you five different ways.

M2 · TEAM EFFECTIVENESS

What is the team not doing because I am doing it?

M3 · PRODUCT & VALUE

What needs to become more transparent about value — without me taking over?

M4 · SYSTEMS & IMPEDIMENTS

Local or systemic — and who can actually change it?

ACTIVE IN VALUE — WITHOUT TAKING OVER

Product decisions stay with the Product Owner; the Developers' decisions stay with the Developers.

— SEVEN WEEKS

ONLINE · seven weeks WEEKLY LIVE · one session ENGLISH · throughout

M0 · WEEK 1

Make your context visible

Reactivate your Scrum foundation, map how value is delivered today and carry one real tension forward.

M1-M5 · WEEKS 2-6

Read it through five lenses

Apply each lens to the same situation, try one move and learn from what happens.

M6 · WEEK 7

Integrate your judgement

Bring the lenses together around a difficult real situation — and what your intervention does to capability over time.

— EVERY WEEK · ONE LOOP IN YOUR OWN CONTEXT

1 Learn

guided material, in pieces

2 Reason

Scenario Practice dilemmas

3 Bring your context

your slot on the shared board

4 Discuss

live session with Mads

5 Try a move

small enough to actually do

6 Observe & refine

next week opens on what happened

Every session opens with: "What happened when you tried it?"

Accelerate value delivery — in your own context.

SM ADVANCED Seven weeks in your own context.

Work on your real Scrum Master situations — not classroom cases.

Guided material · Scenario Practice · own-context application · weekly live session with Mads
